

CSE 111 – Database Systems

Team Evaluation

Grade each team member, including yourself, on a scale from 1 to 15 (1 is the lowest and 15 is the highest). Consider the participation each team member had in each of the project stages. Try to be as objective as possible.

Team member	DB design (1-15)	DB implementation (1-15)	Application development (1-15)	Presentation & demo (1-15)	Overall participation (1-15)

Using the same scale from 1 to 15, evaluate how proficient you are on the following teamwork skills:

- resolve conflicting design ideas (1-15)
- delegate responsibilities fairly between team members (1-15)
- complete your assigned tasks on time (1-15)

1. What are the most important things you learned about working in a team?
2. What are the most important challenges of working in a team that you encountered? How did you solve these challenges?
3. If you would have to do the project again, would you choose the same team?
4. Provide any other comments about your team project experience.
